Main Topics

- 1. Inspiring young talents
- 2. Our patients: better in better out
- 3. Individualized medicine
- 4. Back for future conservative procedures
- Digitalisation From big data to robotics
- 6. Trauma care tomorrow Who is going to take care?
- 7. Prepardeness what is it worth to be prepared?
- 8. Economy and ecology
- 9. Certification and centre formation
- 10. Complication management and septic surgery

General Topics

- 11. Hand surgery
- 12. Shoulder surgery
- 13. Foot surgery
- 14. Pelvic and acetabular surgery
- 15. Spine surgery
- 16. Joint injuries
- 17. Polytrauma
- 18. Arthroscopic surgery
- 19. Arthroplasty
- 20. Revision arthroplasty
- 21. Tumor surgery
- 22. Pediatric orthopaedics and traumatology
- 23. The elderly patient
- 24. Rheumatology
- 25. Rehabilitation
- 26. Legislation / MDR
- 27. Pain management
- 28. New professions
- 29. Varia

Basic Research

- 30. Osteoarthritis and tissue degeneration
- 31. Post-traumatic inflammation and regeneration
- 32. Implant associated infections
- 33. Fracture healing and bone metabolism
- 34. Biomechanics and motion analysis
- 35. Innovation in imaging and diagnostics
- 36. Materials and implants
- 37. Health services research telemedicine
- 38. Experimental research
